IBA Agile Transformation Solutions

Improving Project Success Rates & Increasing Business Value Through Agile

IBA's agile experts are technology partners with our clients. We offer decades of experience training teams in agile development practices for government organizations and departments.

IBA is dedicated to helping our clients enable better and faster business decisions through the effective adoption of agile practices and techniques. Our experts can help drive agility within your organization, helping your teams accelerate time to market, improve quality and productivity, reduce risk, and align business and development objectives.

Why Choose IBA?

We know there isn't a one-size-fits-all approach to Agile transformation - and every client has unique needs. IBA's knowledgeable professionals will work with your team to assist and guide your organization's Agile journey by crafting a strategy that is right for your environment, project goals, and business objectives.

What We Offer

Agile Leadership
We provide forward-thinking leadership to drive a culture of agility within your organization. IBA places an emphasis on developing people, teaching others to become agents of change within the organization, and grooming leaders to drive productive teams.

Lean Product Discovery
We cultivate innovative thinking and an entrepreneurial approach within your organization by introducing Agile tools, processes, and technology to drive early business realization, increase productivity, and deliver product functionality faster.

Agile Governance, Reporting, and Metrics
Our experience with Agile lifecycle management (ALM) tools, such as Jira, allows us to establish different types of testing practices, progress reporting procedures, and metric measurement techniques within

IBA CAN HELP YOUR ORGANIZATION:

▷ Build on customer feedback

▷ Reduce project delivery risk

▷ Enable enterprise-wide transformation with innovative solutions to problems

Scaling Agile Services

Our customized approach is based on your organization's strengths and current agility. We work with your teams to assess, align and accelerate the scaling of your enterprise using Scaled Agile Framework (SAFe).

Agile Assessment

Our proprietary Agility Health Assessment process identifies gaps, develops targeted growth plans, and measures results in the following areas: Product Owner, Technical, Software, Quality, Team, Sprint, and Release.

Agile Tool Implementation

We implement tools to build on Agile methodologies and the application lifecycle—so you can extend agility beyond your development teams to the enterprise itself.
